DISTRACTED DRIVING IS DANGEROUS DRIVING

Distracted driving is the cause of as many as 80 percent of all traffic crashes. Distraction occurs when a driver is delayed in the recognition of information needed to safely accomplish the driving task because something within or outside the vehicle draws attention away from driving.

Safe driving requires your eyes, mind and hands fully focused on the road.

You've driven distracted if you have ever:

- Eaten food while driving
- Gotten lost in a daydream while driving
- Talked on your phone or texted behind the wheel

Come take a drive with us and learn ways to kick distractions to the curb.

WHEN: Monday, July 14
